GENERATING CLEAN ELECTRONS TECHNOLOGY PROGRAM

The GT-1500 Clean Electron Generation Panel provides students an introductory hands-on interactive experience with the 3 leading sources of alternative energy generation technologies.

- **Basic Wind Turbine Operation**

Installing and testing a wind turbine.

- **Off-Grid Wind Turbine Systems**

Configuring and testing off-grid installations.

- **Wind Power System Design**

Design/create a wind turbine

- **Basic Solar Power Operation**

Installing, combining and testing solar panels.

- **Advanced Solar Panel Systems**

Configuring, testing and operating off-grid solar installations.

- **Solar Power System Design**

Design/create a solar charging system for portable hand-held devices.

- **Basic Fuel Cell Operation**

Connecting a fuel cell for electrical generation

- **Advanced Fuel Cell Operations**

Configuring, testing and operating off-grid fuel cell installations.

- **Adding a Fuel Cell to an Alternative Power System**

Connecting a fuel cell into alternative energy systems for off-grid operations.

- **Combining Wind and Solar Power Systems**

Configuring and testing combined alternative energy systems for off-grid operations.
