SMART GRID

GT-7000

- Types of energy
- Potential and kinetic energy
- Voltage and current
- Electrical loads
- Electrical power consumption
- Power math
- Making electrical connections

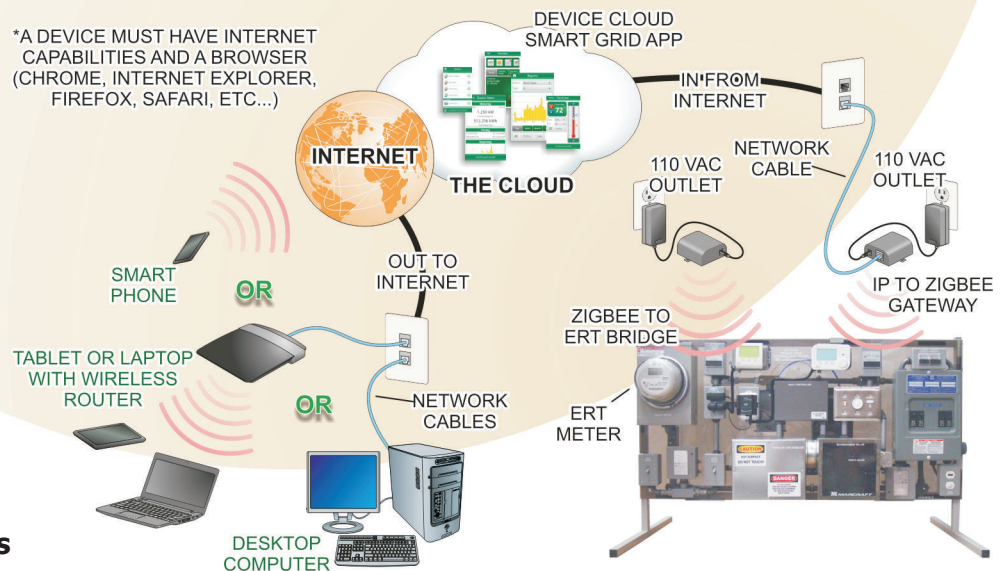

- The power grid
- Power quality and outages
- Generation and storage options
- Distributed power equipment/cogeneration
- Energy distribution vs. bulk storage
- Demand response & power storage management

- Smart grid communications
- Meter management systems
- Smart meters
- Residential, municipal and commercial grids
- Support for demand & automated adjustments
- Smart grid development
- Research and regulation
- Dealing with renewable energy

- National Electrical Codes
- Underwriters Laboratories
- EPA
- OSHA
- National Fire Protection Association

- Schematic drawings
- Working drawings
- Symbols and scaling
